

## HOW THE POLL WAS CONDUCTED

The Mason-Dixon Virginia Poll was conducted by Mason-Dixon Polling & Research, Inc. of Washington, D.C. from October 20 through October 21, 2008. A total of 625 registered voters were interviewed statewide by telephone. All indicated that they were likely to vote in the November general election.

Those interviewed were selected by the random variation of the last four digits of telephone numbers. A cross-section of exchanges was utilized in order to ensure an accurate reflection of the state. Quotas were assigned to reflect voter turn-out by county.

The margin for error, according to standards customarily used by statisticians, is no more than plus or minus 4 percentage points. This means that there is a 95 percent probability that the "true" figure would fall within that range if the entire population were sampled. The margin for error is higher for any subgroup, such as a regional or racial grouping.

### **OBAMA HAS NARROW LEAD IN VIRGINIA**

State voters give Obama the edge on the issue of handling the economy (48%-41%), as well as on managing health care (53%-35%) and energy policy (44%-43%), while McCain gets stronger marks for national security (55%-39%), managing government spending & taxes (49%-42%) and handling the Iraq War (52%-51%).

The economy remains the top issue, but there has been some drop off (from 69% to 57%), with the shift primarily coming from voters expressing increased concern about taxes and government spending.
